# 1. Summary

## **START PAGE COUNT**

---

### **1. Summary**

**Please provide a short summary of the proposal, which could be the same as the proposal abstract, built around a research/innovation project.**

## 2. Excellence

### 2.1 **Quality, innovative aspects and credibility of the research** (including inter/multidisciplinary aspects)

You should develop your proposal according to the following lines:

- Introduction, state-of-the-art, objectives and overview of the action
- Research methodology and approach: highlight the type of research and innovation activities proposed
- Originality and innovative aspects of the research programme: explain the contribution that the project is expected to make to advancements within the project field. Describe any novel concepts, approaches or methods that will be employed.

The text should emphasise how the high-quality, novel research is the most likely to open up the best career possibilities for the Experienced Researcher and new collaboration opportunities for the host organisation(s).

## 2. Excellence

### 2.2 Clarity and quality of transfer of knowledge/training for the development of the researcher in light of the research objectives

A two way transfer of knowledge should be described:

- The text must show how the Experienced Researcher will gain new knowledge from the hosting organisation(s) during the fellowship through training.
- These organisations **may** also benefit from the previous experience of the researcher. Outline the capacity for transferring the knowledge previously acquired by the researcher to the host organisation(s).

For Global Fellowships explain how the new acquired skills and knowledge in the TC will be transferred back to the host institution in Europe.

### 2.3 Quality of the supervision and the hosting arrangements

#### **Required sub-heading:**

- **Qualifications and experience of the supervisor (s)**

Information regarding the supervisor(s) must include the level of experience on the research topic proposed and document its track record of work, including the main international collaborations. Information provided should include participation in projects, publications, patents and any other relevant results.

To avoid duplication, the role and profile of the supervisor(s) should only be listed in the "Capacity of the Participating Organisations" tables (see section 6 below).

The text must show that the Experienced Researcher should be well integrated within the hosting organisation(s) in order that all parties gain the maximum knowledge and skills from the fellowship.

**For GF both phases should be described**, for the outgoing what practical arrangements are made in place to host a researcher coming from another country and for the return period what measures are planned for the successful re-integration of the researcher.

# 6. Table

All organisations (whether beneficiary or partner organisation) must complete the appropriate table below. Complete one table of maximum one page for the beneficiary and half a page per partner organisation (min font size: 9). The experts will be instructed to disregard content above this limit.

<b>Beneficiary X</b>	
<b>General Description</b>	
<b>Role and Commitment of key persons (supervisor)</b>	<i>(Including names, title, qualifications of the supervisor)</i>
<b>Key Research Facilities, Infrastructure and Equipment</b>	<i>(Demonstrate that the team has sufficient facilities and infrastructure to host and/or offer a suitable environment for training and transfer of knowledge to recruited Experienced Researcher)</i>
<b>Independent research premises?</b>	
<b>Previous Involvement in Research and Training Programmes</b>	
<b>Current involvement in Research and Training Programmes</b>	<i>(Detail the EU and/or national research and training actions in which the partner is currently participating)</i>
<b>Relevant Publications and/or research/innovation products</b>	<i>(Max 5)</i>

## 2. Excellence

### 2.4 Capacity of the researcher to reach and re-enforce a position of professional maturity in research

Please keep in mind that the fellowships will be awarded to the most talented researchers as shown by their ideas and their track record, where it is a fair indicator given their level of experience.

# 3. Impact

## **3.1 *Enhancing research- and innovation-related human resources, skills, and working conditions to realise the potential of individuals and to provide new career perspectives***

In this section, please explain the impact of the research and training on the *Experienced Researcher's* career. The fellowship, including any secondments in Europe should maximise the impact on the researcher's activity on European society, including the science base and/or the economy, in a manner appropriate to the research field.

# 3. Impact

## 3.2 *Effectiveness of the proposed measures for communication and results dissemination*

### Required sub-headings:

- **Communication and public engagement strategy of the action**
- **Dissemination of the research results**
- **Exploitation of results and intellectual property**

Concrete plans for the above must be included in the Gantt Chart.

The new knowledge generated by the action should be used wherever possible to enhance the career of the researcher, to advance research, to foster innovation, and to promote the research profession to the public.

## 4. Implementation

### **4.1 Overall coherence and effectiveness of the work plan, including appropriateness of the allocation of tasks and resources**

The proposal should be designed in the optimal way to achieve the desired impact.

A Gantt Chart should be included in the text where the following should be listed:

- Work Packages description;
- List of major deliverables;
- List of major milestones;
- Secondments if applicable.

The schedule should be in terms of number of months elapsed from the start of the project.

# 4. Implementation

## **4.2 *Appropriateness of the management structure and procedures, including quality management and risk management***
